Udacity

## PROFILE INFO

I am a skilled web developer with a strong focus on backend development. I possess a deep understanding of key programming languages and technologies, including Flask, React, and PostgreSQL, with a primary emphasis on backend technologies. Through self-directed learning and hands-on experience, I have honed my expertise in designing and building robust, scalable, and efficient backend systems that power modern web applications. My commitment to staying current with the latest backend development trends and best practices allows me to deliver high-quality solutions that meet the unique needs of clients and exceed expectations.

## EXPERIENCE

### Freelance Web Developer

October 2023 - Current

- Designed and developed a responsive website for a local barbershop, featuring an appointment booking system and service listings.
- Utilized React to create a user-friendly and visually appealing site.
- Ensured cross-device compatibility for a seamless user experience.
- Delivered project on time and provided ongoing maintenance and updates.
